Applications Development
AGILE Methodologies

My Wins

Oya.com.ng

Managed different projects and wore many hats until acquisition by Wakanow.com

Sangalo

Took over a failing project and led it to a successful acquisition

Verifi

Took over a behind schedule project from Gigster, built a strong technical team; currently redesigning the product and managing delivery to date.

TIMELINE

- 2017** ● **Head of Products**
BlockPanda
Remote/USA
- 2016** ● **Head of Operations & Tech**

ABOUT ME

Hi!

Over the last 4+ years, I have found that high level problems drive me to seek the **best unique experiences** by design for each product.

This has taken me on a journey through various industries, wearing hats from Product Developer to Head of Operations. Through them all, I have applied lessons learnt from various best practices [e.g. the UX classes from Masumi Matsumoto (Google) and S.L. Rao (Microsoft)] and also from personal experience.

I am interested in any opportunity to **build products that are useful, usable, and beautiful** ~ Looking to join a team that truly values creativity, innovation, and an enthusiastic design culture.

P.S. I get stuff done.
